

# Who are We?

## About us:

Rockhop is a Microsoft Partner fully dedicated to helping our customers transform their business with Power Platform solutions. We meet you wherever you are in your journey to envision, design, build and deploy solutions that help you solve problems and realize measurable results.

Rockhop is purpose-built to positively impact the lives of our customers, partners and colleagues. It was the vision of four industry veterans who came together to build something better. Beyond their decades of experience, our founders apply vision with focus. We believe in empowering and engaging over command and control. We believe that a commitment to measurable customer impact and foundational values is core to fulfillment and success. We believe that we wouldn't need one another if we were all the same, diversity and debate make us stronger.

### Process Automation

From simple approval workflows automating mundane tasks to the complexity of scheduling data moves, HR onboarding or automating legacy systems, we use Microsoft's Power Automate, Azure Automation, AI models and Virtual Agents to help you improve productivity and drive consistency. Rockhop will work with your team to identify, design and build automated solutions with Power Platform that unlock your business potential.

### Analytics and Data Insights

Use Microsoft's Power BI solution to help you turn your data into information. Rockhop will help you collate your diverse and complex data into meaningful insights surfaced in visual dashboards that can be distributed across your organization to empower your business users to make informed and impactful decisions. Rockhop will help identify gaps in your current toolset, define requirements and build a solution to securely present real-time business insights in the hands of your problem solvers.

### Citizen Developer Program

We work with you to establish a framework that empowers your users to solve problems at the source. Microsoft's Power Apps provides a low-code or no-code platform for business users to develop solutions that enable collaboration, remove barriers to productivity and gain powerful insights. Rockhop will collaborate with your team to build communication and training plans, guidelines and guardrails for development and foster a community for continuous learning to drive meaningful business value with Power Platform

### Application Modernization

Whether you have aging applications, consolidation needs, or new ideas we will help foster and facilitate the move to a modern platform. We help our customers replatform solutions like InfoPath, SharePoint Forms, Google Apps, Lotus Notes or evolve existing applications to meet mature business requirements. Rockhop has the experience and expertise to help you create a vision, plan, backlog and delivery of these solutions.

### Center of Excellence

A Center of Excellence is made up of two parts – a team that drives the success of Power Platform and the analytics that guide you on business optimization decisions. Together we will help you define the vision, objectives, and metrics of success. Establish a plan to drive adoption and bring your community of makers together by leveraging the skills and experience of people working within the business. Whether you have the time or need help managing the environment, Rockhop is here to help.

### Data Connectors and the Dataverse

Data is at the center of everything we do. It provides us with information to make informed decisions that drive results within our business. How we rely, organize, connect, and secure data are critical to the success of the processes, analytics, or solutions we build. Whether it's a custom or known solution, we provide the expertise and best practices on how to organize data and connect to common or custom sources.

## Who are we?

We have 30+ years of experience working together in Microsoft professional services where we were first to the cloud

Our deep and wide global network within Microsoft and across the industry allow us to lean on our partners and most skilled experts to deliver innovation and impactful solutions.

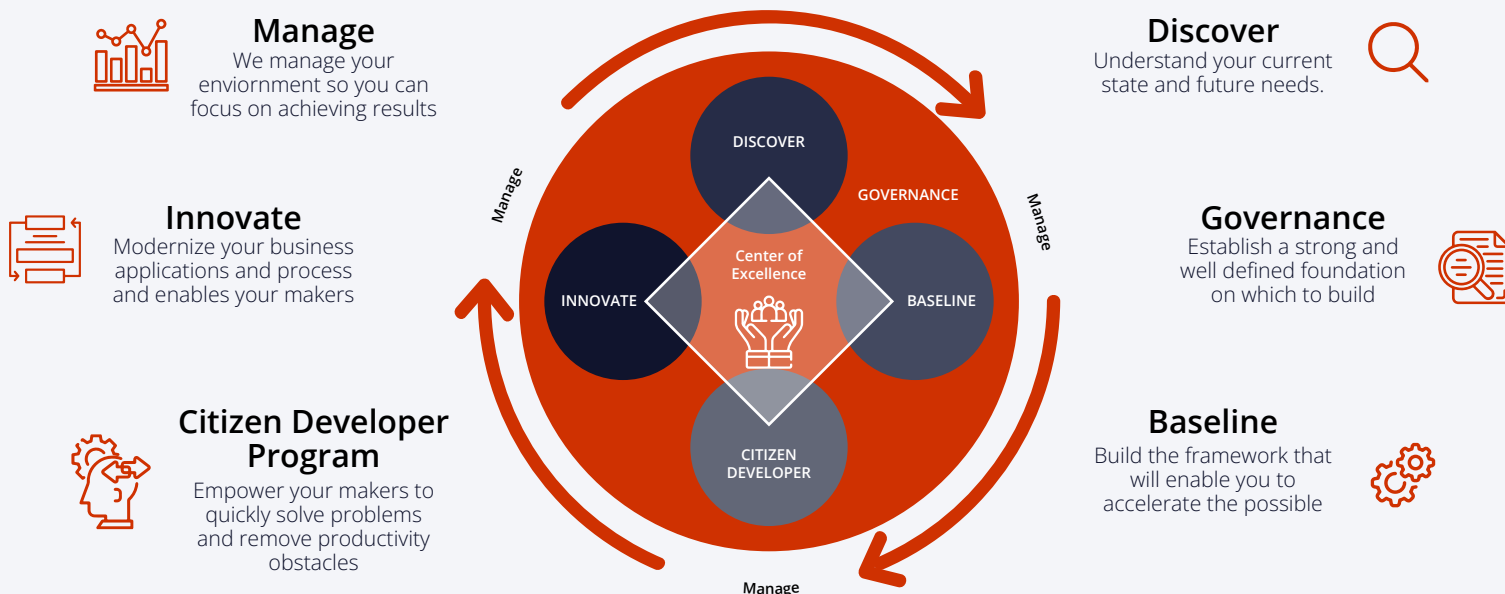

We are excited about Power Platform because of its truly transformative capabilities, and we measure it. We want to help you achieve results and use this as the compass for everything we do.

We like working together and it's core to our culture! We root for each other and for you. You will see proof in quality of our delivery and our lasting relationships.

## Our Approach:

## Our Values:

### Excellence without Arrogance

Humility comes naturally to those confident in their abilities. We pause to listen because seeking to understand should always precede seeking to be understood. We embrace the learnings that come from fast failures and slow successes alike.

### Uncompromising Transparency

Knowledge is power, and we're more powerful together when we communicate openly. There are no secrets among us, our partners, investors and customers.

### Measurable Results

If we cannot identify how we will deliver measurable results to any customer or partner, we should not engage. We value and celebrate results, and we take pride in the impact our work delivers.

### A Place We Like

We embrace diversity, demonstrate empathy, and seek fun. It starts with the team. Talent attracts talent and values attract similar values, but embracing our differences ensures we approach our work with an open lens. We expect that all "Rocker's" will look back on these times as the best of their careers, and customers will recall a collaboration and level of expertise beyond any they have experienced.
